

DSP Group Demonstrates at CES Latest Innovations in Cordless Solutions, VoIP Devices and Connected Multimedia Screens

January 4, 2010

SAN JOSE, Calif., Jan 4, 2010 (GlobeNewswire via COMTEX) -- DSP Group, Inc.(TM) (Nasdaq:DSPG), a leading global provider of wireless chipset solutions for converged communications at home, announced today that DSP Group will demonstrate at CES its new and advanced cordless solutions, VoIP devices for home and office, and connected multimedia screens. DSP Group's chip-sets are designed based on open systems such as Android(TM) to provide VoIP, DECT, Wi-Fi, multimedia and high definition voice capabilities for connected devices at home.

DSP Group will be exhibiting at the Courtyard Las Vegas Convention Center (meeting room B), which is located just across the street from the central exhibition hall, during CES exhibition hours, from January 7 to January 10, 2010.

Demonstrations will include:

- * Connected Multimedia Screens - Wireless multimedia screens running the open platforms like Android, that have an intuitive touch-screen interface, and integrate voice, data, audio and video at lower system costs for mass market adoption.
- * VoIP Devices for Home and Office - Embedded VoIP and cordless solutions, such as IP-phones, IP DECT, and cordless PBX system for SoHo, as well as office devices with large screen display for on-line information.
- * Cordless Solutions - DECT/CAT-iq integration into home gateways, wireless headsets and monitoring/security solutions and a full range of cordless phones.

"The growing popularity of multimedia applications and open platforms has created a whole new breed of connected devices for the home," commented Oz Zimmerman, Corporate VP of Marketing at DSP Group. "As the first company to bring Android to the home phone, and the only provider of a SoC solution including DECT, Wi-Fi and multimedia, we are committed to shape the future of converged communications at home."

About DSP Group

DSP Group, Inc. (Nasdaq:DSPG) is a leading global provider of wireless chipset solutions for converged communications at home. Delivering system solutions that combine semiconductors and software with reference designs, DSP Group enables consumer electronics (CE) manufacturers to cost-effectively develop new revenue-generating applications with fast time to market. At the forefront of semiconductor innovation and operational excellence for over two decades, and with a dominant share of the wireless home telephony market, DSP Group provides a broad portfolio of wireless chipsets integrating DECT, Wi-Fi, PSTN and VoIP technologies with state-of-the-art application processors. Enabling converged voice, audio, video and data connectivity across diverse consumer products -- from cordless and VoIP phones to home gateways and connected multimedia screens -- DSP Group proactively partners with CE manufacturers to shape the future of converged communications at home.
